

Electric Vehicle (EV) Infrastructure Network

Electrical Contractor Installation and Services

Interested in Joining the Electric Vehicle Revolution?

AeroVironment (AV) is actively accepting applications for electrical contracting companies to join its nationwide residential and commercial charger installation and service network to support the broad launch of passenger and fleet electric vehicles (EVs) across North America. Licensed electricians in this network provide residential & commercial site assessment, field installation, and warranty and service support for AV's broad suite of EV charger products. **Come join the company that played a leading role in the development of breakthrough technologies including the first modern electric vehicle, back-packable unmanned airplanes, and the largest commercial fast charging network in North America.**

What type of companies are we looking for?¹

- Experienced, and established companies with proven residential & commercial install/service track record
- Forward-looking companies that can envision and support the future of broad-based clean transportation infrastructure
- Strong customer service orientation
- Ability to respond to contacts and scheduling requests very rapidly and in real time
- Technical savvy especially regarding CRM Web portal use, real-time scheduling, and email communications
- Meets applicable licensing and insurance requirements
- Excellent safety and performance history
- Inventory management systems and skills

How will you become a part of the EV revolution?

- Participate in AV-sponsored training and certification programs
- Provide turnkey charging equipment installation solutions
- Provide support for both residential and commercial customers
- Conduct field site assessments, quotations and data entry via online interfaces
- Support AV's warranty and non-warranty service needs
- Present a positive customer experience on behalf of AV and its business alliances
